*Please refer to our response to the Sites and Boundaries consultation which covers the main issues.*

*In general terms we welcome the **Key Objective** of enhancing the footpath and cycle links to the existing network and surrounding settlements, including a new greenway. As stated we have major concerns as to the proposed line of the A610 Brimington to Staveley bypass which will disrupt green space and increase noise and other pollutions near the canal. We are also concerned at the management and status of routes designated as greenways.*

*The recently announced proposed route of HS2 will obviously have a major impact but details at present are not sufficiently accessible to the public in a clear format to enable further comment.*
